

WHIP HOLDER

After mounting your whip holder to your wall, trailer or wash rack area, place whip into Whip Holder as follows:

- (1) Whips are tapered, therefore making them a smaller diameter near the end/tip. Raise your whip to the middle or lower portion of the whip.
- (2) Place whip into the front of the Whip Holder.
- (3) Lower the whip into the "funnel" of the whip holder, as shown. This will secure your whip in the holder.
